

1. Comet
 2. Constellation
 3. Galaxy
 4. Space probe
 5. Spacecraft
 6. Space shuttle
 7. Space station
 8. Asteroid
 9. Rocket
 10. Launcher
- A. a vehicle in which people travel into space and back again, sometimes carrying a satellite or other equipment into orbit
 - B. a vehicle in which people can travel round the earth, outside its atmosphere, doing scientific tests
 - C. a named group of stars
 - D. a device that sends something such as a rocket or a missile into the air with force
 - E. a combination of rocks and iron (too small to form a planet) that circles the sun
 - F. an object that moves around the sun, usually at a great distance from it, that is seen on rare occasions from the earth as a bright line in the sky
 - G. a large cylinder-shaped object that moves very fast by forcing out burning gases, used for space travel or as a weapon
 - H. any vehicle used for travel in space
 - I. a small spacecraft, with no one travelling in it, sent into space to make measurements and send back information to scientists on earth
 - J. a very large group of stars
